

Nintex Exhibits at 2015 Microsoft Australia Partner Conference

PR Newswire
MELBOURNE

MELBOURNE, Australia, Aug. 23, 2015 [/PRNewswire/](#) -- Nintex, the global standard in workflow automation, today announced the company is exhibiting at the 2015 Microsoft Australia Partner Conference (APC), August 31 – September 3 on the Gold Coast. Nintex will demo its workflow automation platform including forms and mobile apps within the ISV Showcase for conference attendees.

"We are excited to participate at Microsoft APC where we will celebrate the successes of our current partners over the past year and connect with new ones as we continue to grow our partner network across the region," said **Nintex VP of Sales in APAC Dan Parker**. "Nintex has proven to be a real driving force of Microsoft's mobile-first, cloud-first strategy, and we're looking forward to strengthening our partnerships with born-in-the-cloud partners through to our major solution providers like Dimension Data, Empired, NEC Australia, and many others."

Nintex, founded in Melbourne, was named **2015 Microsoft Office and SharePoint Application Development Partner of the Year** and won five **2015 Office App Awards** from Microsoft on July 13 at the 2015 Microsoft Worldwide Partner Conference (WPC) in Orlando.

During WPC, <https://www.nintex.com/wpc>, the company also announced strategic investments in the Nintex Global Partner Network including the introduction of differentiated tiers, new self-serve trainings and certifications, and core marketing assets to drive partner profitability and to ensure customers' continued success with Nintex. The newly launched **Nintex Partner Portal**, <https://partner.nintex.com>, offers enhanced content and single sign-on (SSO) to multiple Nintex properties, including key CRM functionality to help partners co-manage pipeline transparently and more efficiently.

Microsoft General Manager, Worldwide Partner Group Gavriella Schuster commented within a WPC-related blog post, "Nintex's solution – a workflow automation platform built on Office 365 that can be delivered in the Microsoft cloud, on-premises, or as a hybrid model – is itself a tremendous tool for increasing productivity and simplifying workflows." She added, "Like Microsoft, Nintex knows the incalculable value of strong partnerships and works hard to make it easy for their partner community to successfully sell their products."
