

Nintex Brings Modern, Dynamic Forms to the Cloud

Nintex Forms Available Across Web and Mobile, Anywhere Enterprises Need Them

BELLEVUE, Wash., Sept. 21, 2017 /[PRNewswire](#)/ -- Nintex, the leader in workflow and content automation, is pleased to announce the worldwide availability of its modern, responsive and dynamic forms for today's information worker.

Available in all implementations of the Nintex Workflow Platform, including [Nintex Forms for Office 365](#) and [Nintex Forms for Nintex Workflow Cloud®](#) and natively mobile enabled, everyone benefits from an intuitive, integrated, intelligent and fast experience to create, automate and maintain **modern forms** to capture critical information.

"Nintex has been at the forefront of driving 'modern' digital forms that render elegantly anywhere on any device," says **Nintex CTO Alain Gentilhomme**. "Nintex Forms work online and offline, leverage business rules and logic to make forms more scalable, sophisticated, and drive meaningful action on the data collected through seamless integration with our Nintex Workflow Platform."

Nintex customers and partners have created tens of thousands of forms that have been submitted hundreds of millions of times to capture critical information including:

- **Embedded Forms in Websites:** allows users to quickly and easily create and embed a dynamic, web form that can route collected data to critical systems of record like Salesforce or Microsoft Dynamics CRM. This capability powers user experiences like citizen self-service, customer service requests and more.
- **Capturing Customer Feedback:** leverage the Rules Builder to implement dynamic presentation logic into forms to guide and automatically customize the user experience.
- **Field Service Performance:** enable field service agents to capture critical data while in the field using Nintex Mobile offline capabilities, complete with support for offline data submissions.

Key features of modern Nintex Forms include:

- **Drag and Drop Designer** – quickly and easily create and update branded forms using clicks, not code
- **Business Rules** – guide and automatically customize the forms experience based upon key business rules and logic
- **Offline Enabled** – access and utilize forms offline, caching entered data until mobile devices is reconnected
- **Responsive Design** – build once and deploy anywhere across any form factor ensuring a consistent user experience
- **Mobile-First** – easily use native mobile capabilities such as QR and bar code scanning, attachments and geolocation

Additionally, for customers already using Nintex Workflow Cloud it is easy to experience the latest with Nintex Forms by designing and publishing workflows with Forms as the trigger.

"Nintex has designed the Nintex Workflow Platform to ensure process automation initiatives focus on the needs of the business versus being driven by technical implementations and timelines," says **Nintex Partner Raphael Bachmann, Project Manager at IOZ**. "Nintex Forms are a powerful capability that allow form designers to easily create new forms and enables end-users to input higher quality data thanks to its business rules functionality."

Michael Akalu, SharePoint Administrator, IT of Keller Foundations, the world's leader in geotechnical solutions, adds, "The new responsive design capability of Nintex Forms provides a great modern look and feel to our organization and is welcomed by our entire team. As we drive agile process optimization across our company, Keller is committed to providing our thousands of employees with technologies that empowers them to achieve results. Nintex is a key part of this effort as the forms technology makes it quick and easy for our employees to gather important data, which is necessary to achieving their day-to-day activities."

To begin a free trial of Nintex Workflow and Forms in the cloud visit www.Nintex.com/get-started or see Nintex representatives at Microsoft Ignite, booth #1301 during Expo Hours, from September 25-29 in Orlando.
