Nintex Named the Leader in Business Process Management by G2 Crowd

Public and private sector organizations rate the Nintex Platform as the top software platform in the new G2 Crowd Summer 2018 Grid® Report for Business Process Management

BELLEVUE, Wash., July 26, 2018 /PRNewswire/ -- Nintex, the world's leader in intelligent process automation (IPA), is pleased to announce today the Nintex Platform is the industry's top-rated software platform for easily automating business processes according to G2 Crowd's Summer 2018 Grid® Report for Business Process Management.

According to G2 Crowd, a peer-to-peer business solutions review platform, business process management software helps define, automate and report on processes. This type of software is intended to optimize how businesses run and help end users to accelerate business outcomes.

"Our mission is to improve the way people work through process automation," said **Nintex CEO Eric Johnson**. "The new G2 Crowd Grid Report helps demonstrate that our solutions are meeting customer needs and driving productivity so that they can spend their time being strategic, creative and innovative."

All products shown on the **G2 Crowd Grid® Report for Business Process Management | Summer 2018** are ranked by customer satisfaction and market presence and must receive a minimum of 10 reviews/ratings gathered before June 6, 2018. The report is available for complimentary download at http://www.nintex.com/BPMGrid.

High Satisfaction with the Nintex Platform

Nintex received the highest satisfaction scores among all products reviewed in G2 Crowd's latest Grid Report. The feedback from business process management software users is consistent with the changing nature of the market. The emergence of easy-to-use, no code solutions like Nintex redefine the intelligent automation of processes.

Every day, more than 7,500 public and private sector organizations around the world turn to the Nintex Platform to digitally transform both simple and sophisticated business processes across major ecosystems like Box, Salesforce, SharePoint, Office 365 and more. Earlier this month, Nintex shared that customers using Nintex for Office 365 have surpassed 75 million workflows executions, a continued sign of momentum for no code process automation solutions.

Nintex customers recognize many benefits of the Nintex Platform, sharing their feedback on G2 Crowd:

Quick time to value, saving time in hours/days versus weeks/months

> *"The best feature of Nintex Workflow is all of the time our school district saves using workflows for approval of requests. From purchase orders to reserving vehicles to ordering supplies, our workflows save our administration and transportation staff many hours with the automation."*

No code, easy-to-use solution to automate processes from the simple to the sophisticated

> *"When we upgraded to Nintex, the whole process became so simple. With basically no code knowledge, my business users can create advanced complicated workflow in SharePoint."*

Reliable, scalable and performant cloud platform

> *"The software is very stable and we rarely need support but in those few instances that we do, we always receive excellent support and guidance."*
