Nintex Recognized as a Leader in Inaugural Aragon Research Globe™ for Digital Business Platforms, 2018

Tech-focused research firm recognizes Nintex for its success with customers and the speed, ease and power of the company's digital business platform

BELLEVUE, Wash., Aug. 22, 2018 /PRNewswire/ -- Nintex today announced that the company has been named a **Leader** in the Aragon Research Globe™ for Digital Business Platforms based on an evaluation of 27 major providers in the market.

Aragon describes in this report how Digital Business Platforms (DBPs) intelligently coordinate goal-directed work by supporting interactions between people, software and machines. DBPs are about accomplishing work digitally, and more importantly about dynamic, goal-driven processes, cites the report.

"When choosing a Digital Business Platform, organizations should first examine which customer experiences, processes, decisions and associated resources should be fully digital," says **Jim Sinur, VP Research and Fellow at Aragon Research**. "Aragon recognizes Nintex as a Leader because of the speed, ease and power the platform provides to end users in the development and optimization of digital workflows."

The Nintex Platform is a powerful set of intuitive, integrated and intelligent solutions that empower operations, IT and business leaders to unlock the transformational business benefits of intelligent process automation technologies. The platform includes capabilities for advanced workflow, DocGen™, modern forms, mobile apps, and process intelligence. With clicks not code, it is faster and easier than ever to automate, orchestrate and optimize business processes.

Nintex customer **Blake Scott, Enterprise SharePoint Program Manager at Emerson Process Management**, adds, "The internal audiences at Emerson that are supported by Nintex go beyond IT, including engineering and finance. Because the Nintex Platform is intuitive to use, the technology has reduced the technical skill set needed by our teams to automate a range of previously manual and paper-based processes which is saving us all valuable time and resources to focus on more meaningful work."

Nintex expanded its capabilities last month by acquiring Promapp, a market leading visual process management solution used by hundreds of public and private sector organizations to easily map and manage business processes. By bringing together the power of the Nintex Platform with Promapp, customers and partners can design, deploy and manage their end-to-end business processes.
